

Technical Data Sheet

Eyewear protection: Protection Goggles:
Type W10720 – WESION20

for procurement units of the crisis and intervention agencies

The Wesion20 eyewear protection made of polycarbonate were designed at short notice in light of the existing emergency situation for use in hospitals and nursing homes as visitor and laboratory spectacles. It can be worn over most prescription glasses as overglasses.

The Wesion 20 eyewear protection meet the requirements of EN 166 for PPE eye protection in terms of design, choice of materials and ergonomic design. These goggles are suitable for keeping liquid splashes such as secretion droplets (spray aerosols in coughing reactions and blood splashes in trauma care, as well as splinters (bone splinters, metal splinters, etc.) away.
